### **Our Mission & Vision**

Brainwave The Irish Epilepsy Association dedicates itself to strive for the creation of a society in which people with epilepsy have the right and the opportunity to participate in at all levels and by providing a quality service to its members, clients & health professionals. In Brainwave we try to conduct our work in a way that respects people, their human rights and in doing so, empowers people to make a difference to their lives. We are the only National Voluntary Organisation with charitable status dedicated to the promotion of an optimal quality of life for people with epilepsy and where possible, the alleviation of the effects of the condition. As part of this aim, Brainwave attempts to increase awareness and change negative attitudes about epilepsy.

**The only National Charity Providing Support, Advice and Information to people with epilepsy in Ireland**
