Epilepsy is a neurological condition characterised by recurring seizures. It can affect anyone at anytime. There are almost 40,000 people with epilepsy in Ireland, including an estimated 10,000 children under the age of 16.

Epilepsy Ireland was established in 1966. Our vision is to achieve a society where no person's life is limited by epilepsy. We are committed to working for, and to meeting the needs of everyone with epilepsy in Ireland and their families and carers.
